

Single File CSV Definition

Overview

A single file will be generated for this export. It will always contain a header row and use the delimiter of your choosing (one of comma, pipe, tab or semi colon). Each piece of data may be escaped by double quotations (“”).

Products.csv

Products.csv

This file contains products which met the publish criteria you set in your price list configurator within Stock in the Channel and will contain the columns you chose. (The file generated may not contain columns in the same order).

Name	Format	Example	Comments
ID	Int32 Not nullable	1	Unique product identifier
SKU	Text Max length 255 chars Not nullable	A3L791B02M-GRN	
BrandName	Text Max length 255 chars Not nullable	HP	
Name	Text Max length 255 chars Not nullable	Patch cable - RJ-45(M)	
Stock	Int32 Not nullable	1	
Price	Decimal Not nullable	18.04	Up to 4 decimal places
Cost	Decimal Not nullable	17.55	Up to 4 decimal places
